

Pre-packaged integration solutions for the cloud.

as low as

\$ 199 / mo.

Up and running in days, not months.

100% Cloud -- Zero Hardware. Zero Installation.

OVERVIEW

C2tools is a set of pre-packaged integration solutions built to solve real-world client issues, using Frontera's Integration Cloud. This unique infrastructure and method of service delivery allows Frontera's Certified Solution Architects and Senior Developers to rapidly design, build and deploy lightweight integrations that meet specific client requirements. The integrations below are already proven in real-world conditions and can be provisioned and configured for you at a fraction of the cost of custom development -- and your subscription to the service covers all costs of infrastructure and support!

Infrastructure

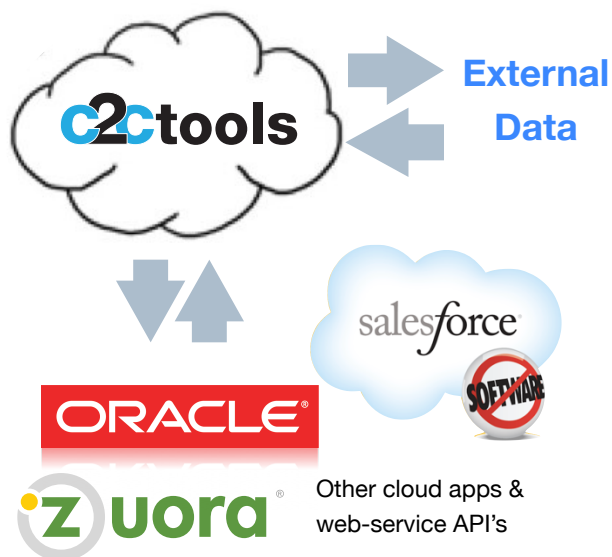

Modular & Scalable

- Built on Force.com/Heroku state-of-the-art cloud infrastructure
- Virtual servers, independent code, separate memory space

Secure

- Data centers ISO27001 security certified
- Geographically dispersed, mirrored, with built-in replication
- No single point of failure

C2Ctools SOLUTIONS

FX Update	Using a rate file or 3rd party currency rate service, <i>FX Update</i> calculates the base currency amount for Invoices, Invoice Items, Payments, Refunds & Adjustments and stores it in Zuora for reporting. Can be used to calculate Gain/(Loss) on F/X.
Payment Portal	Pre-built customer-facing payments page. <i>Payment Portal</i> will allow a Zuora tenant to point customers to a hosted web page that can display open invoices & accept a credit card payment via Zuora's PCI-compliant Hosted Payment Method (HPM).
Credit Card Data Migration	A secure one-time process that protects your data and makes it possible to migrate card data from an existing provider to Zuora's PCI-Compliant system.
True Dunning	<i>True Dunning</i> enables escalating Past Due notifications by changing the Communication Profile on the Account based on the oldest past due invoice.
Invoicing Data Sync	Copies values from custom fields located on the subscription rate plan charge to the respective invoice item for presentation on the invoice template.
Enhanced Reporting	Retrieve data from Zuora that is not available in standard Data Sources, Z-Reports or Exports. Customized formatting and presentation and scheduling of reports.
Lockbox	A lightweight service to pick up your bank file and process it into Zuora as External Payments. Eliminates the need to maintain an application server.
